**48VDC Input Fiber Port PoE injector**

**Product Overview**

PT-PSE105GWS-2D is a single-port, industrial-scale PoE injector with fiber port. It provides 55Vdc, 1.1A power for remote PDs over full 4-pairs output with 6KV (10/700us) surge protection. It supports 10/100/1000Mbps of data speed. It works for 60W PoE PDs, such as wireless access points, network cameras, Voip phones and other high power Ethernet terminals. It is also compatible and safe to use with any IEEE802.3at/af, PoE++ compliant terminals. It works as a switch, data is interoperable between Lan port, PoE port and SFP port.

PT-PSE105GWS-2D is designed for indoor use. It works with input voltage of 44-57Vdc and operates under -40°C to 65°C. It has detection chip inside, which will detect and classify PD before powering it. It will not apply power until a standard-compliant PD is detected. The effective distance is 100 meters over Cat5e/Cat6 cables. This model equipped standard DIN rail mounting bracket, which can easily jam into the guide rail.
