

PT-PSE105GBS-D

Industrial 95W Fiber PoE Injector

Product Overview

PT-PSE105GBS-D is a single-port, industrial-scale, PoE injector with fiber port. It provides 95W power for remote PDs over full 4 pairs output with 6KV (10/700us) surge protection. It supports 1000Mbps of data speed. It works for 95W PoE PDs, such as wireless access points, network cameras, Volp phones, Base station, Microwave radio and other high power Ethernet terminals. It is also compatible and safe to use with any IEEE802.3af/at/PoE++ compliant terminals. It works as a switch, data is interoperable between PoE port and SFP port.

PT-PSE105GBS-D is designed for indoor use but can work outdoor by covered with waterproof case. It works with input voltage of 50-57Vdc and operates under -40℃ to 65℃. It has detection chip inside, which will detect and classify until a standard-compliant PD is detected. The effective distance is 100 meters over Cat5e/Cat6 cables. This model equipped standard DIN rail mounting bracket, which can easily jam into the guide rail.
