

PT-PIS8PB2SM-E

DIN-Rail PoE Switch

Product Introduction

This DIN-rail PoE switch includes two 2.5G/1G SFP ports and eight RJ45 ports, operating in -40°C to 65°C environments. It supports IEEE 802.3bt with up to 90W per port and total PoE power up to 360W at 48V input. PoE management features include remote control, power prioritization, and real-time monitoring.

Layer 2 features like VLAN and port mirroring ensure stable data transmission. The compact DIN-rail design enables easy deployment in smart poles, transport systems, and energy sites.
